RESPECT FOR OUR SOILS

An in-depth survey of our 150 hectares of vineyards and exhaustive testing of soils have led us to identify 18 different types of terroir which we tend dynamically.

Our soils consist mainly of clay, gravel, sand and lime stone. This type of soil produces wines with potency conferred by the clay, while the gravel and sand provide a delicate finesse and the lime stone gives them depth and a rich gamut of nuances.

THE PERSONALITY OF THE TERROIR

A respect for the identity of the terroir and being able to transmit its personality through our wines is the maxim that leads our grape growing and winemaking tasks.

Our philosophy is based on the use of approved environmentally-friendly products that meet biological agriculture requirements.

HARVEST

The grapes used to make our Marqués de Velilla joven were picked in late September /early October.

The proximity of the vineyards to the bodega and a transport method based on small quantities at a time ensure that they will arrive in optimum condition at the cellar.
